WORK EXPERIENCE

Intertoys, Culemborg — Employee

Here I have gotten my communications skills from. I have gotten it from there because a lot of the customers were sometimes very upset about something and acted like it was the employees fault.

Coop, Beusichem — Cashier/stock clerk

Here I had 'fun' working. My boss was nice, so were my fellow employees. I don't want to talk about this furthermore due private reasons.

't Veerhuys, Beusichem — Employee

to Present Day

And here I am working now. My fellow employees are nice. They also like to chat, in between the hard work of course ;)

EDUCATION

PWA Beusichem, Beusichem — Graduated

This was my elementary school. I can't tell much about it, since it wasn't that special. Just like every elementary school; you make friends and play with them day after day.

Lek en Linge, Culemborg — Graduated

This was my high school. Before you had actual classes you were able to choose between 3 subjects you want to specialize in. I chose to specialize in so called 'Techniek Breed'. It means that I followed classes in all sort of technical stuff, for example: You went from making diagrams in excel to welding your own things.

GLU, Utrecht — Studying

until 2022

And here I am right now. Studying Game Development at GLU in Utrecht. Here I do learn about not only making games, but also about what makes a good game. Besides that I also learn software development.
